

Raymond Recorder

Vol. 28

FRIDAY, FEBRUARY 22 1929

No 3

Local and General

The marriage of Miss Melba West to Mr. John Plekott, both of Raymond was solemnized at Stirling Thursday February 14 th. with Bishop Arthur Fawns officiating. The newly-weds are residing at Stirling.

Mr. and Mrs. Thos. E. Ott, of 1120 Garden St., announce the marriage of their daughter, Edna, to Mr. Cecil Smith, of Oakland, Cal. The ceremony was solemnized at the family residence on Saturday evening, February 9, in the presence of the near relatives and a few intimate friends, and following was the buffet luncheon.

Mr. and Mrs. Smith left on Sunday morning for an extended wedding trip to California cities, after which they will make their home in Oakland, where Mr. Smith is located in business. Mr. Smith is the manager of one of Skagg's Chain grocery stores at Oakland.

The opera "Pickles" was repeated by request last Monday evening at the Opera House, a fair crowd was in attendance when one considers the large crowd that witnessed the first good this time," others, "much better."

The New Dayton Amateur Dramatic Society will present a three act comedy entitled "The Elopement of Ellen," at the Capitol Theater on Friday, March 8.

Mrs. Dr. G. W. Leech entertained a group of friends after the Ice Carnival last Wednesday evening. Appropriate Valentine decorations were carried out. Bridge was the feature of the evening after which a dainty luncheon was served to the following guests: Mr. and Mrs. T. George Wood and Mrs. H. Y. Hodge, Mr. and Mrs. S. B. Card and Mr. and Mrs. F. R. Taylor.

INDOOR PLANTING

Many tender bedding plants for the window box and hanging baskets can be grown by the amateur if started indoors this month, while the hardier sorts if given an earlier start in this way will come into bloom several weeks sooner than if planted directly in the open. The same is true of many vegetables such as tomatoes, cabbages, lettuce, melons, and even a few beets, carrots, and hills of corn.

Starting these indoors will materially hasten the time when they will be ready for the table. A shallow cigar box or something similar is the best thing to grow these in where space is limited, or if there is plenty of room a florist's "flat" - a shallow box 12 inches by 18 - may be used. Punch a few holes in the bottom of the box to allow drainage, and add a layer of cinders or gravel to serve the same purpose. Get some fairly good soil, and break it up fine. Moist-en the earth, then mark off the rows which need only be one inch apart sow the seed, and cover the top of the box tightly with a piece of sack or burlap. This keeps the seeds in a warm, dark place, and when they have pushed up through the soil, remove the burlap, and give them full sunlight. Unless there is a storm window on the outside, keep the box back at least eight inches from the glass to avoid drafts and low temperature.

HOW TO MAKE A HOT BED

Where one has a larger garden and wants to get off to an early start, it is better to build a hot bed than to try and grow the early plants indoors. Secure some fresh horse manure, which has been turned every day or so to prevent burning, and store this in some sheltered spot until ready to use. The hot bed should be located where it will be convenient for the attendant, and it must be protected from the north and west winds by fences, buildings, or shrubbery. Make a pile of manure eighteen inches deep and be sure it is well pressed down. If drainage is good, a hole may be dug and the manure placed in this. On top of the manure place a light frame of wood any desired size and cover tightly with a window sash.

Relief Trip Made By Air

Lethbridge was thrilled last Sunday morning when Capt. McCall pilot of the Greatwestern Airways, Stinson-Detroit plane took off at 9 a.m. with Dr. J. S. Wray on a mission of mercy to the Skiff oil field where two men had been seriously wounded as a result of a dynamite explosion. These caps were in the bunk house occupied by the two men that were injured, and for some unknown reason exploded, badly wounding the two men. It was impossible to bring aid by way of automobile owing to the badly drifted roads. The services of the plucky flier and Dr. Wray was brought in. Within 20 minutes after leaving Lethbridge the plane made a beautiful landing at the oil field.

Necessary first aid was rendered, and the wounded prepared for the flight back to Lethbridge. A perfect landing was made despite the deep snow at the airport, and a waiting taxi rushed the injured men to the Galt hospital where on Monday morning they were doing nicely.

The distance to Skiff by car from Lethbridge is 75 miles and at present would have been impossible to make it.

Perhaps with in a few years such incidents will be very common.

We might expect to see some folks in Raymond dashing to Calgary to buy the wife a new spring coat—etc.—etc. Who knows but what the plane will be used to hunt the sly and elusive coyote that roams the hills.

How about rounding up the cattle with such a machine, all the necessary noise formerly required would be supplied by the roaring motor.

Hate

Perhaps the most disgusting dangerous and damnable sin in this world is hate or bitter feelings towards any one.

Lincoln once said that no man who had resolved to make the most of himself can spare time for personal contention and still less can he afford to take all the consequence including the violating of his temper and the loss of self control.

Lincoln lived as he talked. The one man who was perhaps his most dangerous political foe, the one who called him a low cunning clown and the original gorilla, was made secretary of war. Politics nor personal feeling entered not into his heart when it came to the affairs of state. When asked why he did it he replied "Because I believe Stanton the best fitted in the land for that position."

S. of A. "Dolls Up"

The dance given by the students Council on Thursday, February 14th, was a great success. The auditorium was very beautifully decorated in keeping with the occasion and the people seemed to be possessed with the spirit of Valentine. All report having a very merry time.

By the evidence of the many mar-cels and white collars, apparently the student body wish to look their best for the 1929 year book. J. F. Atterton and Son of Cardston are the ones to make the request "Hold It"

sloping this a few inches towards the front which must be south. Cover the manure with three or four inches of fine soil. The bed will heat up rapidly at first, but by the fourth day will have cooled down sufficiently to allow planting. In cold weather water sparingly and only on bright days. Ventilate a little every day by raising the sash, keeping this open longer as the days grow warmer. Plants should be transplanted once, and hardened off in a cold frame which is similar to the hot bed only without the manure, before being set outside.

RAYMOND'S HONORED GUESTS ARE AGAIN FETED

Last Wednesday February 20 th. marked another Honored Guests reception with splendid success.

The weather man seemed to favor the day, which added to the enjoyment of all. For the first time in years the bob sleigh was used to gather up and take home the guests owing to the drifted roads.

There were 137 people served at the first table, all wearing the honored guest ribbon. The next table served the committee and helpers numbering about 33.

A splendid program was given in the afternoon with Mr. Bert Kirkham acting as master of ceremonies. Talks were given by Mr. Arthur Dahl and Jas E. Meeks. Solo by Mrs. Valeria Allen, community singing was led by Jas. H. Walker, O. H. Snow talked on Our Honored Guests, Mrs. Powelson responding.

The oldest man present was Mr. Petty age 82, from Foremore. Mr. Petty traveled 100 miles for this reunion. Sister Powelson, age 80 was the oldest lady present. A number of Coaldale, Barnwell and Cardston old timers were present.

The early evening was spent at the Capitol Theater, then another lunch was served to about 70 people. The remaining part of the evening was spent in dancing. All seemed to have enjoyed the festivities of the day.

The committee in charge wish to thank the management of the Opera House for their generous assistance, also the management of the Capitol Theater for the splendid entertainment there, and all those who assisted in calling for, and the taking home of the Honored Guests.

Dehlin Bennett left last Saturday for Red Deer on a visit to Mr. and Mrs. D. C. Peterson. Pete has a modernly equipped job printing plant at that point and is doing a good business.

The comedy play, "M. Pim Passes By," by the Stake Mutual, passed by with bad weather the chief reason for a comparatively small house. The players all did well with their respective parts, and much credit is due them for the work required to put over these home dramatics.

Miss Inez Gagnier skis for the love of the thrill of the sport. Her instructor, Ivin Nelsen, engages in the sport professionally. Both, however, agree that the environs of Quebec are unequalled anywhere in the world as a skiing or general sport playground. Besides tutoring the third and giving periodic exhibitions of skiing, Nelsen, with his fellow professionals at the Chateau Frontenac, Bessie, Oliver Baldahl and Arnold Stone, all of whom are internationally known, organize parties to such places as Montmorency Falls and other favorite skiing localities within a few miles of Quebec.

Broadway Store To Concentrate On Dry Goods Department

Elsewhere in this issue appears an announcement regarding the Broadway Store disposing of the Grocery Department of this well known establishment, in order to enlarge and concentrate upon their other departments. The manager C. W. Brewerton is a recognized figure in business circles in the south, having been employed for several years by King Bros., and later as manager of the Huh Company. The Broadway Store was then organized and has been enjoying their share of the local business for over fourteen years.

The management feels that by eliminating the grocery department they will be able to expand and enlarge their present stock of men's wear, dry goods etc., and be in a better position to serve the public with the most up to date lines in every department.

W. I. Meeting

The regular monthly meeting of the W. I. was held February 14th. at the United Church. Mrs. Thomas Allen President, in the chair. Twenty two ladies were present. Roll call was answered with a valentine verse.

Miss Page delighted the ladies with her very pleasing book review of "Jalna." Dr. G. W. Leech gave a paper on "Child Hygiene." This was very interesting and instructive dealing with the effects of our school system on the physical welfare of the child, and suggesting the schools have both medical and psychological examinations, then group the students for class work according to the results of these examinations. The meeting closed with singing God Save Our King.

Don't forget, "Home Came Ted," the comedy play to be given by the Second Ward M. I. A. Watch for date.

INSTRUCTIVE LECTURE DELIVERED BY DR. LEECH

CHILD HYGIENE

By
Dr. G. W. Leech

Child Hygiene should be of vital importance to the parent, the physician and the citizen. It pertains to the welfare and development of the child, physically, mentally and morally. The best time of applying the laws of hygiene is in the days of childhood and youth, for then the whole organism is plastic and yields readily to both external and internal impressions and forces.

The welfare of the child should begin in the prenatal state. Heredity plays an important part. The germ of the unborn infant must be complete and untainted in all its nature, otherwise we cannot hope for a vigorous and perfect growth or development.

As the family is the foundation of the state, and society is a congregation of men for the purpose of acquiring greater power and more comforts thru mutual co-operation, the latter whether domestic or civil, has some right to make men understand that they must care for the health of the generations to follow, and to enact reasonable laws looking to the seems to show that no great nation prevention or obliteration of transmissible infirmities. History seems to show that no great nation has ever been destroyed or overcome until its people had first neglected or abused the laws of hygiene, heredity, and sociology.

The same mental and physical parental imperfections are apt to be congenitally inherited by the child and if so should be early recognized and assistance given to overcome them.

School Hygiene

I consider it regrettable that more women are not serving on our school boards, for it is the mother who is most interested in the health and development of the child on account of her closer association. We should consider the personal hygiene of the scholar, the conditions of his health, his habits, the amount of work done, the sanitary environments and requirements of the school and building, the furniture, the ventilation and heating and the influence of all these upon the individuals and development.

There are disorders to which all children are subject whether in school or out; but a special class are markedly influenced by school life or work, and to these abnormal conditions we may give the term "School Pathology." Of some of these, overwork is the cause; others are set up by other factors.

Overwork, coupled with depressed vitality or other influences, may give rise in children to one or more of the following troubles: dyspepsia, headaches, nervous derangements, chorea, epilepsy, neurasthenia, backaches, menstrual disorders, and in some cases consumption. On the other hand, improper arrangement of seats and desks, board, etc., may cause spinal and other physical deformities, defective eyesight, etc., of the first class even where the amount of work may not seem, or may not really be, too much for the capacity of the child, worry about rank or over an approaching examination may have a harmful effect upon a nervous temperament.

This is especially so if the examinations come at the end of a spring term when scholars are all more or less worn out and debilitated. The forcing process should be avoided as far as possible, and if grades are to be given at all, they should be as much as possible for the work and attendance during the term and not so much for the actual work done at examination time.

Moreover, young children should not be kept in school for too many hours in the day nor should school be looked upon by parents as a place to which to send children to keep them out of the way and from mischief. "Edwin Chadwick has shown that a child from five to seven years can only attend to one object for about fifteen minutes; one from seven to ten for twenty minutes; from ten to twelve for twenty minutes; etc., and that the length of individual lessons and like wise the total days work should be arranged accordingly." The very early years of school life should be given to inculcating correct habits of attention and of morals and to training the will and powers of concentration and observation, rather than to the teaching of any special knowledge.

HIGHLIGHTS

(from King of Kings)

The remarkably beautiful scene of the festivities at the home of Mary of Magdala, the assumption of appointments, the banquet and the departure of Mary in search of Jesus after wondering she will return with her friend whom Jesus has made one of his disciples.

The meeting of Mary and Jesus and the purgation of the Seven Sins by which the Magdalene, forsaking her friends, becomes a follower of the Christ.

The appeal of the blind girl to the Madonna on the restoration of her sight by Jesus.

Jesus ministering to the sick and needy, thereby rousing the hostility of the authorities who give orders that He be watched and restrained if necessary.

The healing of Mark amid popular rejoicing.

The saving from a clamoring mob of the woman caught in adultery and His command, "Let him who is without sin cast the first stone."

The meeting of the conspirators and the acceptance by Judas of thirty pieces of silver to betray Jesus.

The cleansing of the Temple by Jesus, who drives forth the money changers, releases the doves and animals and is acclaimed by the populace as the King of Kings.

The plot to destroy popular faith in Jesus by exposing Him as an impostor.

The raising of Lazarus from the dead.

The miracle of the finding of a Roman coin in the fish's mouth.

The tempting of Jesus by Satan and his refusal of the offer made Him.

The Last supper when Jesus tells His disciples, among them Judas, that "one of you shall betray me." Judas slinks guiltily away.

The betrayal of Jesus by Judas in the garden of Gethsemane on Olivet and the arrest of the Master by the Roman soldiery.

Peter's denial of Jesus and the consequences thereof.

His condemnation by the Sanhedrin and appearance in the hall of Pilate, the Roman governor, who saying, "I can find no fault in this man," would have released Him had not the minions of the Roman conspirators raised the cry, "Crucify Him!"

The Via Dolorosa and crucifixion at Golgotha. The frightful storm and earthquake, and the flight of the terrified populace.

The suicide of the remorseful Judas by hanging.

The Resurrection and the appearance of the Risen Christ before His disciples and His final vanishment—"Lo! I shall be with you always!"

ve, for twenty five minutes, etc., and that the length of individual lessons and like wise the total days work should be arranged accordingly." The very early years of school life should be given to inculcating correct habits of attention and of morals and to training the will and powers of concentration and observation, rather than to the teaching of any special knowledge.

It is probably the work attempted out side after school hours and not the actual work done in school, that is most responsible for the breaking down of health. While a child is at school its mind should not be wearied by outside tasks, as music or painting lessons, nor the body weakened by social dissipation, late hours, and indigestible food. In all children the obtaining of good health and a sound constitution is of the first importance. Youth is the time for gaining health, not for losing it; for building up sound bodies and constitutions, not for breaking them down, and school-life should always have the former as one of its greatest ends.

Of what use is all the learning one may gain before the age of eighteen, if there is no strength to use it afterward in the battle of life.

The West and Its Natural Resources

The question of the transfer of the public lands and natural resources in the West by the Dominion to the three prairie provinces is once again very much to the fore. Ever since the provinces of Alberta and Saskatchewan were formed; in fact, to some extent ever since Manitoba was created a province, there has been a demand on the part of the Western Provinces that they should be placed in a position of equality with the older provinces in the matter of ownership and control of the public domain.

Fortunately, the question has now passed out of the realm of partisan controversy, because all political parties, Liberal, Conservative, Progressive, at Ottawa as well as in the Prairie Capitals, are agreed that the transfer should be made. Not only so, but the Governments of the Eastern Provinces have waived the objections so long urged by them. It is now only a question of reaching terms acceptable to the West on the one hand, and the rest of the Dominion on the other hand.

Negotiations are now under way with all three prairie provinces. In the case of Manitoba, agreement has been reached with the Dominion to the extent that a Commission is now engaged in studying the whole question of terms. Negotiations with Alberta reached the point of an agreement being actually signed between the two Governments, but later, Ottawa proposed to insert a provision relative to the school lands which was unacceptable to Alberta, and the agreement was not proceeded with. Ottawa has since modified its position and an early settlement of outstanding differences seems likely.

Saskatchewan's position is somewhat different from that of the other provinces. Whereas Alberta is rich in coal, oil, and other resources apart from lands, and recent discoveries have revealed a Plin Flon and a Sheritt-Gordon in Manitoba, Saskatchewan's mineral wealth is yet to be proven. Furthermore, Saskatchewan's chief wealth has been found in its agricultural lands, and to a large extent these have already been disposed of by the Dominion, with the result that there is not as great wealth to be handed over by the Dominion to Saskatchewan as exists in the case of the other two provinces. Saskatchewan, therefore, has a stronger claim for compensation for lands alienated under Dominion administration for the general benefit of all Canada. However, negotiations are in progress.

The sooner all these questions are finally settled and the Western Provinces placed in control of their lands and resources the better. There cannot be complete unity among the provinces, nor full development of a national spirit and aims, so long as Western Canada feels it is forced into a position of inferiority to the Eastern Provinces. The interests of the Dominion demand the removal of any cause for such feeling. Further, whatever arguments may have been convincing in 1905 for retention of the public domain by the Dominion on the ground that they could administer them better than could the newly created provinces with all the manifold tasks before them, and with but small populations and financial resources, those arguments are removed now that there are over two million people in the three prairie provinces with fully developed governmental institutions and strong financial credit.

Constitutional issues, it is true, are involved in any consideration of this matter. The West does not, and cannot, accept the interpretation placed upon certain enactments by the Dominion and the Eastern provinces, notwithstanding that Eastern opinion is greatly modified to what it was a few years ago. It would, however, be a mistake for the negotiating parties to take up positions based solely upon constitutional grounds. To do so would mean long and expensive litigation right through to the Privy Council, in England. Then, when the legal and constitutional issues were finally settled, an army of expert accountants would have to be engaged for years to delve into all the many transactions involving lands and resources since the passage of the first Dominion Lands Act, in 1872.

The sane, sensible, business-like thing to do now is for the representatives of the Dominion and the Provinces to gather around a table and reach an amicable agreement, fair, reasonable and acceptable to all. The sooner this big issue is settled the better for Canadian national unity and strength, and the quicker will the resources themselves be developed for use of the people and add to the growth, development and wealth of our Canada. So long as they remain in the present unsettled state neither Dominion nor Provincial Governments can proceed with proper and energetic developmental policies, and, as a result, progress is retarded.

Will Introduce Flag Bill

Resolution Dealing With Canadian Symbol Will Be Considered

The adoption of a Canadian flag will come before parliament during the present session through a resolution placed on the order paper by C. R. McIntosh, Liberal member for North Battleford.

The resolution of Mr. McIntosh calls for the appointment of a special committee "for the purpose of considering the advisability of adopting a Canadian flag representing Canada as a whole which shall form part of the British flag as the symbol of the dominion as an equality partner in the commonwealth of British nations."

Non-Inflammable Paper

German Gives Successful Demonstration Of His Fireproof Invention

A paper that does not burn has been discovered. The German inventor, Mr. Franz Fraack, gave a demonstration recently. He took a sheet of ordinary newspaper, crumpled it into a ball, and wrapped this highly combustible object in a sheet of his fireproof paper. Thus protected, he held it for a few minutes in the flame of a laboratory blast lamp hot enough to melt a glass window-pane. Not only did the fireproof wrapping survive, but the ordinary paper inside was not even scorched.

NERVOUS INDIGESTION AS A RESULT OF FLU

A Severe Sufferer Overcame This Trouble By Taking Dr. Williams' Pink Pills

No ailment of recent years has proved so treacherous as has the Flu. The disease itself is bad enough, but the after effects are where the real danger lies. The Flu leaves behind it a weakened body, impoverished blood, shattered nerves and an impaired digestive system. Too much stress cannot be laid on the importance of rebuilding the blood and strengthening the nerves during convalescence. Until the blood is built up there can be no recovery of health and strength. The one sure blood-builder is Dr. Williams' Pink Pills. Start a treatment of them today and see how soon you show signs of robust health again.

Among the many victims of the terrible Flu epidemic of 1919 was Mrs. Irving Maxwell, of Bancroft, Ont. Read what this lady has to say concerning what Dr. Williams' Pink Pills did for her:—"After an attack of the Flu I was left in an extremely weak state. My blood was impoverished; I was seized with indigestion and stomach trouble; my nerves were shattered and nothing my doctor gave me seemed to help me in the least. I continually grew weaker and weaker till finally I lost all control of my nervous system. My mother, who had used Dr. Williams' Pink Pills with good results for anæmia, strongly advised me to give them a trial. I did so, and after using three boxes I noticed some improvement. I persisted in the treatment and by the time I had used seven boxes I was fully restored to health again, and although I am a mother of six children I am now able to do all my work around the house and feel as well as ever I did in my life before. What these Pills have done for me they will surely do for others."

Dr. Williams' Pink Pills are a tonic, not a stimulant. They build up the blood and are a specific for such troubles as indigestion, rheumatism, women's ailments and the general worn-out feeling that affects so many people. They are sold by all medicine dealers or direct by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Airplane Ambulance

Actual Demonstration To Be Given In Paris Next May

The airplane which has already proved its worth as a passenger, mail, and express carrier, is now to become an ambulance.

An international congress will assemble in Paris next May to consider air transportation of sick and injured in both military and civil life. The Commerce Department has been advised by its representatives there.

Actual demonstration of the airplane ambulance will be given at Le Bourget Field, where a pseudopatient will be bundled aboard, carried to some provincial village and returned.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eucletic Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Friction between two surfaces depends upon the pressure applied and not on the amount of surface contact. Theoretically, a large bearing has no more friction than a small one at equal pressure.

No man expects a great deal from marriage. He is quite satisfied if his wife is a good cook, a good valet, an attentive audience, and a patient nurse.

HEADACHE RELIEVED QUICKLY

This Purely Vegetable Pill quickly corrects the digestive disturbances, removes the intestinal poisons, and sick headache quickly disappears. Your whole system enjoys a tonic effect, constipation vanishes, and you feel a renewed vigor. Avoid bromides and dope, they are depressing and harmful. All Druggists 25c and 75c red pkgs.

CARTER'S LIVER PILLS

To Develop Home Art Industries

Canadian Handicraft Guild To Hold Exhibition In Regina

The Canadian Handicraft Guild, whose object is to encourage, revive and develop home art industries throughout Canada, will hold an exhibition in the Saskatchewan Hotel, Regina, March 20 to 23rd, 1920. The exhibit will be open to anyone free of entry fee or charge who is skilled in making bead work, basketry, embroidery, knitting, laces, leather work, metal work, pottery, quilts, rugs, sewing, weaving, wood work, etc. Everything, however, must be handmade.

The object of the Guild is to preserve the knowledge and skill possessed by our people and to encourage industry and thrift in the home of the public, making their work profitable and honourable by means of exhibiting the products of their skill and to keep records in order to prevent the extinction of any arts or crafts. The Guild will undertake to sell any exhibits that are sent in but every person should, of course, put his or her price on the article.

One feature of the exhibit will be to educate the public to the value of good handwork, so that a demand may be created for these handicrafts thereby enabling our people to find their interesting and artistic work at home remunerative.

This is the first exhibition that has been held in Saskatchewan but in other provinces successful exhibitions have been held in which the sales have gone as high as \$50,000.

Anyone interested in any way should communicate with the Secretary, Canadian Handicraft Guild, Saskatchewan Hotel, Regina, and any information will be cheerfully furnished. "The Guild is not a profit-making institution, (there are no exchange fees), but is out to help others help themselves. No time should be lost, therefore, in writing at once to the secretary for information."

The Folk Song and Folk Dance Festival at Regina, will be held at the same time and a most interesting four days is expected.

The First Fort Kamloops

City Of Today Stands On Site Of Old Trading Post

When history was in the making on the wooded slopes of Queenston Heights in 1812, another chapter in Canada's story was being written thousands of miles westward, when Alexander Ross, near the junction of the north and south branches of the Thompson River, traded for ten days with 2,000 Indians gathered at Camloops. A few months later in the fall of the year, David Stuart built the first Fort Kamloops for John Jacob Astor, and here the trade was carried on for many years. Today the city of Kamloops stands on the site of the old trading post, and only a moulding door post, and a cellar overgrown with weeds mark the spot where the hard-faced fur traders stood in the van of the fast-marching white civilization.

PARENTS HAPPY WHEN BABY SLEEPS SOUNDLY

Here's a way to soothe crying, wakeful babies to sleep quickly and easily. It's the way doctors endorse, and millions of mothers have proved is safe and harmless. A few drops of purely vegetable, pleasant-tasting Fletcher's Castoria, has the most fretful, restless baby or child asleep in a few minutes! And for colic, constipation, colds and upset spells, there's nothing like Castoria. The Chas. H. Fletcher signature is the mark of genuine Castoria. Avoid imitations and be safe.

Elevator Merger Announced

The Fort William "Times-Journal" announces the consummation of a merger under which the Western Grain Company, Limited, has been formed to take over the assets and undertakings of six grain and elevator concerns that have been in operation for periods ranging from 19 to 27 years. The companies include the Western Elevator Company, State Elevator Company, Central Grain Company, Spencer Grain Company, Beaver Grain Company and the Western Terminal Elevator Company.

Contract For Sugar Beets

The Lethbridge Northern Irrigation District will contract for 2,000 acres of sugar beets this spring, according to announcement made at the annual meeting of the Southern Alberta Beet Growers' Association.

All mothers can put away anxiety regarding their suffering children when they have Mother's Remedy. Worm Exterminator to give relief. Its effects are sure and lasting.

Whatever He Thought

This isn't a new one, but it is worth re-telling. A little girl ran into her home one afternoon and said to her maiden aunt, a Christian Scientist: "Auntie, you know that old man on the corner who was ill?" "You mean he thought he was ill?" corrected the aunt.

"Well, now he thinks he's dead," said the little girl.

Minard's Liniment for the Grippe and Flu.

CHILDREN'S COLDS

are doubly dangerous after Flu

Physicians advise that the chief danger in this epidemic is AFTER influenza. Then, more than ever, colds attacking a child's weakened system may lead to bronchitis, pneumonia, sinus-trubis, abscess of the ear, mastoiditis, or even the dread meningitis.

Check Colds Without "Dosing"

A peculiarity of influenza is that its toxins leave the digestive system upset. Too much "dosing" further disturbs the digestion and lessens the appetite, just when the child needs nourishment more than ever. Internal medication should therefore be avoided, except on the advice of a physician.

As Vicks VapoRub is applied externally, it can be used freely at the first sign of a cold with no fear of upsetting even the most delicate stomach. Just rub it on the throat and chest at bedtime.

Vicks Acts 2 Ways at Once

(1) Its medicated vapors, released by the body-heat, are inhaled direct to the inflamed air-passages, loosening the phlegm and easing the difficult breathing.

(2) At the same time, Vicks acts through the skin like a poultice, "drawing out" tightness and soreness, and thus helping the vapors to break up the congestion.

Of course, Vicks 2-way action is just as effective for adults' cold-troubles as it is for those of children.

VICKS VAPORUB

For Colds of All the Family

Ex-Kaiser Was Angry

Letter In Reference To Naming Liners Gave Directors Good Laugh

Ex-Kaiser Wilhelm II. it seems, when he heard that two great transatlantic liners now being built at Bremen in Germany, were not to be named, respectively, Frederick the Great and Wilhelm the Great, after two of his most renowned Hohenzollern ancestors, wrote an angry protest to the directors of the company for which they are being built. In this letter he scolded them in terms which must have made them rub their eyes and wonder for a moment whether Germany was now a republic, Wilhelm, an exile in Holland, and their action anything except a flagrant case of lese-majeste. Wilhelm, to be sure—according to report—repented of his letter soon after it was written and tried to get it back before the directors read it, but he was too late. It was opened and read and raised many a good laugh among those in Bremen who are closer to what has happened since 1918 than the square of Doorn.

First Bird—Don't you know better than to sit on this chimney? You're getting all dirty.

Second Bird—Soots me all right.

It is the cause and not the death that makes the martyr.

Queer Sign Of Mourning

It was the custom among Romans to shave off the beard at the age of twenty-one and present it as an offering to the household gods. A beard was grown after that age only as a sign of mourning.

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed."

After trying many treatments, in vain, I at last decided to try

and in a surprisingly short time they did me much good.

Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Of a sane man there is only one safe definition: he is a man who can have tragedy in his heart and comedy in his head.

For Colds -

How many people you know who end their colds with Aspirin! And how often you've heard of its prompt relief of sore throat or tonsillitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have often told you Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is a Trademark Registered in Canada

ASPIRIN

Canada's Aggregate Trade Shows Remarkable Increase In the Last Fourteen Years

Each recurring year comes as a call for personal and national stock-taking. The first concerns the individual personally, the second is the concern of every patriotic citizen. So it is not amiss to consider the position of Canada on her material side and as occupying a place in the world economy out of all proportion to the ratio her population bears to that of the principal countries that are her competitors in the open markets of the world. At the end of 1927 the Dominion ranked fifth in the volume of her imports, exports and general trade, yielding rank in these respects only to the United Kingdom, United States, Germany and France, all nations of greatly larger population. Following Canada, in the order of their trade aggregates, come British India, Japan, Italy, Argentina and the Netherlands.

That Canada should occupy so honorable a position in the trading roster of the world is a matter of legitimate pride, heightened by the rapidity of the Canadian expansion. In 1913, the year before the war, Canada ranked only eighth in the volume of her import trade, tenth in the volume of her exports, and ninth in aggregate trade. The Dominion's rise to fifth place in aggregate value thus lies entirely within the war and post-war periods and is both remarkable and, probably, unparalleled in trade history. Moreover, it is even more surprising when it is kept in mind that Canada still numbers less than 10,000,000 people, and that her increase in population has been relatively slow. Because of this the Dominion takes a much higher place when the point of view is restricted to per capita trade.

In the last complete calendar year before the outbreak of war, Canada ranked seventh in that regard among the countries of the world in export trade, but in 1927 had reached second place, out-ranked by New Zealand alone. In import trade Canada ranked seventh per capita in 1913, rising in 1927 to fifth. In aggregate trade per capita Canada moved from sixth place to second in the same period, being exceeded by the much smaller Dominion, New Zealand. Taking the visible trade balance, Canada held third place in 1927, following the United States and British India, but on a per capita basis, the Dominion led the world.

Canada's fiscal year ends March 31, and for the last complete year to that date in 1928 her aggregate trade was returned at \$2,325,899,934. This represents an increase in fourteen years of \$4,240,635,585, or 114 per cent. Import trade has increased from \$692,032,392 to \$1,087,117,930 by \$395,085,538, or 57 per cent. Export trade has increased from \$393,232,057 to \$1,238,782,004 by \$845,549,947, or 215 per cent. The value of Canadian trade continues to increase, further increments being recorded in the present year. Comparing the aggregate for the 12 months ended July last with the previous corresponding twelve months, an increase is shown of over 5 per cent., both imports and exports being appreciably greater.

Business Is Increasing

The Manitoba Cordage Company reports a year of steady progress. A crop of approximately 1,200 acres of hemp was planted during the year as compared with 600 acres during 1927. Four hundred acres of hemp were grown at Rheim, Saskatchewan. Manufactured products are meeting with a favorable reception and a gradually increasing business is being done.

Self-defence is the clearest of all laws and for this reason—the lawyers did not make it.

Mexico produced almost 25 per cent. of the world's oil in 1920.

Manhood, not scholarship, is the first aim of education.—Seton.

"Mamma is laughing at dad's jokes."—Buen Humor, Madrid.

W. N. U. 1773

Idea Of University Training

When Properly Applied It Is Most Valuable Asset

"A university training is the great ordinary means to a great but ordinary end; it aims at raising the intellectual tone of society, at cultivating the public mind, at purifying the national taste, at supplying true principles to popular enthusiasm and fixed aims to popular aspiration, at giving enlargement and sobriety to the ideas of the age, at facilitating the exercise of political power, and refining the intercourse of private life.

It is education which gives a man a clear, conscious view of his own opinions and judgments, a truth in developing them, an eloquence in expressing them, and a force in urging them. It teaches him to see things as they are, to go right to the point, to disentangle a skein of thought, to detect what is sophistical, and to discard what is irrelevant. It prepares him to fill any post with credit, and to master any subject with facility. It shows him how to accommodate to others, how to throw himself into their state of mind, how to bring before them his own, how to influence them, how to come to an understanding with them.—John Henry Newman.

Winnipeg Newspaper Union

Individual Chic

Its individuality and wearability will appeal to the thrifty woman who chooses practical daytime clothes. The surplus cut of bodice and vestee makes it quite suitable for woman of average full figure. The two-piece skirt cut on conservative lines is just slightly flared. The crushed girde to give smooth hipline is shirred at right side with sash end attached under closing at left side. Style No. 359 chooses sheer woolen with faille crepe vestee. Printed sheer velvet, crepe satia, canton-crepe, flat silk crepe and wool crepe are suitable fabrics that can be worn for shopping or afternoons. For the 36-inch size 3 1/2 yards of 40-inch material with 1/2 yard of 40-inch contrasting is sufficient to copy it exactly. Pattern designed in sizes 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust. Price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada's Copper Production

Government Report Indicates Large Increase In This Industry

Within five years Canada will produce approximately 250,000 tons of metallic copper annually, or roughly ten times the present consumption of the Dominion's industries utilizing this metal, according to present indications and calculations of experts of the Mines Branch of the Department of the Interior, upon a basis of minimum production of newly-developed mines in the Dominion.

Under existing conditions the bulk of the copper thus produced would be refined in the United States and brought back to Canada. This would be the case, at least, until the establishment of a smelter at some suitable point which could refine the production of Canada's eastern mines and the re-opening of the huge smelter at Trail, B.C., which has been closed since the cutting off of its supply of copper ore from the Grand Consolidated holdings at Copper Mountain, now shipping to Tacoma, Wash., for smelting purposes.

Believes Greenland

Route Most Logical

Only Solution To Problem Of Trans-Atlantic Airplane Travel Says Michigan Professor

Prof. W. B. Hobbs, of the University of Michigan, who is laying tentative plans for a fourth expedition into Greenland, believes that the only satisfactory solution to the problem of trans-Atlantic airplane travel lies in the Greenland-Iceland route.

"Since safety is the primary factor in mapping out a regular air route the northern route across Greenland and Iceland is the only one which offers a solution to the problem," Prof. Hobbs says.

"Weather conditions and winds in the far north are much more favorable than those encountered along the traditional ship lanes to Europe and the water jumps much shorter and less perilous.

Care of Cut Flowers

Flowers must be taken care of by the purchaser. When you open a box of cut flowers from the florist's the stems have air in them. So it is not enough that you put the flowers immediately into a vase of water. Cut off about half an inch at the end of the stems and immerse the stems in warm water till the flowers are up to their necks in the liquid. Then the water passages will soon be filled and the flowers are ready for the vases.

Memorial For Pioneer

Near Lethbridge, Alta., a monument consisting of a stone cairn has been erected to commemorate the discovery of a coal mine and the pluck of its finder. Nicholas Sheran was a pioneer of 1872. He was made of stern stuff, for his market, Fort Benton, was 200 miles away. To cart the precious fuel to his market he employed bull teams, and many weeks of hardship and toil it must have taken him.

GOING TO NEW SCHOOL

Miss Edith Bister, teacher at a Toronto public school, is among the 12 teachers who will be sent to one of the other dominions as an exchange instructor for one year.

Supplementary Ration For Breeding Poultry

Good Results Obtained From Use Of Cod Liver Oil

It is now being recognized that the fertility, hatchability, and viability of eggs may be influenced by the manner of feeding the laying hens.

During the hatching season the Experimental Station at Kentville, N.S., carried out an experiment to determine the effects of using such supplementary feeds as cod liver oil, raw liver, bone meal, etc., when added to the regulation ration given to the breeding stock. The regulation ration used consisted of dry mash made up of 100 pounds each of cornmeal, oatmeal, bran and middlings, and 50 pounds of beef meal, 1/2 pound of salt was added to every 100 pounds of the mixture. The test groups of hens were fed alike on this mixture, in addition some of the hens received, when fed singly, cod liver oil, one teaspoonful to four birds daily; raw liver, half an ounce per bird daily, and bone meal, five per cent. by weight of dry mash. When these special feeds were given in combination only half of these amounts were used.

The experiment was divided into two parts with a week elapsing between them. The results of this experiment are given in detail in the report of the superintendent of the station for 1927, published by the Department of Agriculture at Ottawa. The most outstanding conclusion to be arrived at from the study of this report, which may be obtained at the Publication Branch, is that the hens using the cod liver oil were outstanding, particularly in the percentage of hatchability of eggs laid.

Placing the Blame

"Do you claim that your wife dragged you down to this awful plight?"

"Yes, lady; she's the cause absolutely."

"And how did she ruin you?"

"Well, it's like this. I got 'er three good jobs and she lost them all by 'er 'igh'anded ways."

NEW LIEUTENANT-GOVERNOR AND FAMILY

Above is a recent picture of J. D. McGregor, his wife and two sons. Mr. McGregor was named by the Rt. Hon. Mackenzie King to fill the position of lieutenant-governor to Manitoba, which has been vacant since the death of the Hon. T. Arthur Burrows. Picture (1) Mr. McGregor. (2) Mrs. McGregor, who will act as hostess at the Government House. (3) and (4) are Kenneth and Allan McGregor, his two sons, who have large stock farms in New York and North Dakota, but are home to help their father while he is in office.

First Letter Was Carried By International Air Mail Nearly a Century Ago

Forming New Dominion

Territories In East Africa Uniting Under British Flag

A "black dominion" of 10,000,000 persons governed by a scattered handful of white men under the British flag is slowly taking shape in East Africa.

The project includes the vastly rich Tanganyika area. Tanganyika covers 373,000 square miles and has been held by Britain under a mandate since the war. Uganda and Kenya are the other proposed component parts of the new dominion of the British Empire.

A hint of the proposals is found in the report of a commission investigating conditions in East Africa, under the chairmanship of Sir Edward Hilton Young. The commission recommended further improvement in administration and appointment of a high commissioner for the three territories. This might eventually lead to creation of the post of governor-general, according to certain quarters and the first step towards creation of a dominion.

Kenya is the largest white colony, numbering 12,500. The 422 officials there rule some 2,736,000 natives. They are slowly developing a great trade in cotton, hides, ivory and timber with Britain and the United States.

Nairobi, capital of Kenya, is a little city planted in the midst of the jungle.

Tanganyika has a population of almost 4,000,000. Uganda which has been under British rule since 1894, has 3,200,000. In each territory the natives are slowly being educated.

Some observers are of the opinion that the British plan is ultimately to link up these territories with Northern and Southern Rhodesia, which are to the south and under British rule. Then, it is pointed out, the legislative link might be extended to the even larger territories of the Union of South Africa.

See Snow-Garbed Rockies On Skis

Partly Explores Tongvin Valley and Maligne Lake

The magnificent scenery of the Tongvin Valley is greatly magnified by its winter mantle of snow, according to four men who have been seeing it on skis. Warden Macklin, Frank Borstrom, Joe Weiss and R. Morrison have returned to Jasper after three days' exploring. Using a log cabin as their base, they visited Chrome Lake, Amethyst Lake, Mont Lake and the country about the base of Tongvin Hill. They encountered five feet of snow on the elklands, and good skiing conditions. Much of the small bush and low trees of the summits was covered by deep snow, which provided a much larger sliding surface than would appear to the eye of the visitor in the summer time. The return route was from the Maccreb Pass and down the Portal Creek valley to the Edith Cavell motor road and the main Athabasca Valley.

The same group skied from Maligne Canyon to Medicine Lake cabin, a distance of about 13 miles, pushed on another 10 or 11 miles to Maligne Lake and spent some time in these magnificent surroundings. They saw a large herd of caribou on the west shore, about a mile from the chalet, many deer and abundant moose tracks. Among the animals they saw on the Tongvin trip were caribou, wolverine and lynx.

Idea Was Not a Success

The impotency of two pairs of reindeer into Switzerland last spring has not proved successful. Of the four animals which arrived in Chateau d'Oex only two now remain. During the exceptionally hot summer both the males died, as did two young ones, born in June. This will be a disappointment to the winter sports enthusiasts, who were looking forward to a new form of sledding, in which the reindeer was to have taken the place of the horse as motive power.

Subject To Question

Although a tablet on a London tavern states that Samuel Pepys, the famous diarist, was born in house on that site, there is doubt about it. No one really knows whether he was born in London or in a Huntingdonshire town.

Containing only three streets and less than one hundred houses, St. David's, in Pembrokeshire, England, has a famous cathedral and is entitled to call itself a city.

An interesting "story of the first air mail," a story that must be little known, was sent to the Manitoba Free Press from the Winnipeg vice-consulate of the Netherlands. The story explains how:

"The first letter known to have been sent by international air mail was received by Willem I., King of the Netherlands, more than 92 years ago. It happened on Nov. 7, 1836. On that day, Robert Holland, a British capitalist, accompanied by Monck Mason and Charles Green, embarked in a balloon for a trip across the North Sea channel. The King's councillor-general at London, Mr. J. W. May, handed the balloonists a letter addressed to the King of the Netherlands. The balloon landed at Wellburg, Germany, where the letter was mailed to The Hague. King Willem was so delighted with the novelty of the fact that he ordered the letter to be filed with the annotation 'to be carefully saved.'"

Of course this disclosure of mail delivery made by balloon nearly a hundred years ago is a sharp contrast illustrating the advances in the uses now made of the air. Indeed, where a start even had not been made, an advance can hardly be recorded. Controlled aerial locomotion is so new that it did not exist when balloons were tossed about at the mercy of each whiff of wind. When the King of the Netherlands thought wonders had ceased when his letter descended with the balloon which transported it, nothing was known of air craft and air service as we have come to know them. Nothing of this was known at the beginning of last century, and little more at the beginning of this one. Knowledge of transport's newest dimension manifested itself only in the last quarter-century, and the greatest strides in putting it to the most astounding practical uses have been taken in the last ten years or so.

As the vice-consul of the Netherlands remarks, "Today the sending of mail from Holland to the Dutch East Indies, and return, a distance each way of about 10,000 miles, is a common occurrence." And he asks, "What would King Willem have said if he had received a letter from Batavia or Sourabaya, written ten days previously, and reading, 'We hereby confirm our telephone conversation held this morning, etc.'? Yet such letters are actually being received in Holland today.

Whatever the King of the Netherlands would have said at the thought of such rapid communication, he couldn't, a hundred years ago, have regarded it as much more unlikely and wholly impossible than did most of this generation at the beginning of this century. And it is altogether permissible to presume that the King of the Netherlands referred to would be little more perplexed at the advances made in the air since his time, than we would be with the further advances that will be made in the next fifty or a hundred years.

Auto Blazes Northern Trail

The second automobile to make its difficult way over rough trails and tote roads from Saskatoon, Sask., to The Pas, arrived there recently. The motorists were E. E. Smith and S. Johnson, of Saskatoon. Until they bounced into The Pas no motor car had made the trip since John Brennan drove over logs and muskegs in 1924.

"He sure believes in Farm Relief."

"Yeah?"

"Yeah, just foreclosed the mortgage an' relieved me of my farm."

Pedestrians should be seen and not hurt.

Another British Stronghold

Harbor At Malta One Of World's Greatest Naval Stations

The island and harbor at Malta, under British management has been converted into one of the greatest naval and coaling stations in the world. In strength and impregnability it is said to now rival the famous rock of Gibraltar.

The old fortifications were useless against attack of modern aircraft, and the British have completely altered the naval batteries and land defenses of the islands. Today they are among the most formidable in the world.

A large military and civil air-drome has been constructed at Hal Far, making another link in Britain's world-wide system of air communication. A floating dry dock, capable of accommodating the largest vessels in the world, as well as new refitting yards, large magazines and many other improvements, have been completed.

Malta is the headquarters of the British Mediterranean fleet, probably the most powerful flotilla of warships afloat, and is also one of the most important ports of call in the world. It lies midway between Gibraltar and Port Said. Although in area Malta is three times the size of Manhattan Island, it has only one-tenth the population of the Borough of Manhattan. The last census showed less than 225,000 inhabitants.

KEEP YOUR BABY HAPPY AND WELL

Every mother wishes her child or children to be well and happy; to be bright-eyed, rosy-cheeked boys and girls. No mother, though, can expect her children to escape all the ills of babyhood and childhood, but she can do much to help them fight the battle for health.

All prudent mothers constantly keep at hand the means of aiding their little ones when sickness comes suddenly—as it generally does in the case of children. In every home where there are infants and young children Baby's Own Tablets should be found. Read what Mrs. Mary Hill, Centre Dunsmuir, Ont., says concerning these Tablets:—"I am the mother of six children and would not be without Baby's Own Tablets. They are a wonderful medicine for little ones."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus break up colds and simple fever, banish constipation and indigestion and allay the irritation accompanying the cutting of teeth. They are absolutely safe and are pleasant to take. The Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

GRIDDLE CAKES

Who doesn't like griddle cakes? From father to the youngest member of the family, every one clamors for more—when they are tasty! Here is a tested recipe:

- 1 cupful Borden's St. Charles Milk.
- 1 cupful water.
- 2 tablespoonsful melted butter.
- 1 egg, well beaten.
- 3 cupfuls white flour.
- 1 teaspoonful salt.
- 4 teaspoonfuls baking powder.
- 2 tablespoonsful sugar.

Combine the milk and water, add the shortening, sugar, and the egg, and beat in the dry ingredients which have been sifted together. Beat thoroughly and fry as usual on a slightly oiled griddle, or on an un-oiled aluminum or soapstone griddle. If very thin cakes are desired, add two more tablespoonsful of St. Charles milk and water. For further interesting recipes write for the Borden Cook Books, addressing The Borden Co., Ltd., Dept. W1, 140 St. Paul St., Montreal.

Just about the time you wonder why someone has escaped the penitentiary so long, he comes out as a candidate for some important office.

Scott & Bowne, Toronto, Ont.

Dry mouth and parched throat are grateful for the refreshing coolness of Wrigley's Spearmint.

Wrigley's whittens teeth, sweetens the mouth, clears the throat and aids digestion, while the act of chewing calms and soothes the nerves.

Good Market For Whitefish

Calgary Man States U.S. Favors Great Slave Lake Product

People in Chicago may soon be eating Canadian whitefish purchased on their home market for 15 cents a pound, according to W. J. Madden, of Calgary, Alta., who was in Montreal recently making necessary rail transportation arrangements.

The fish will be caught in Great Slave Lake, a lake which provides almost virgin fishing waters, according to Mr. Madden. He stated that it abounds in whitefish, a food that is looked upon with favor throughout the United States. He plans to operate a number of five-ton trucks over the ice of the Slave and Athabasca rivers to Waterways, and then to Chicago by rail, taking about four days in all to complete the journey.

At present, however, the open season for whitefish in Canada ends in February, and Mr. Madden went to Ottawa to seek an extension of the season to the end of March. He believes that if this extension is granted, Chicago will provide an active market for whitefish during the Lenten season.

Persistent Asthma. A most distressing characteristic of this debilitating disease, is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wiser precaution can be taken than that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from the tender air passages.

Canada Early Prize Winner
That Canada early took foremost place in fish culture is indicated by the fact that in 1883 at the Great International Fisheries Exhibition in London, she carried off the highest award, namely, the gold medal and diploma for the best and most complete fish-breeding establishment in the Exhibition.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the writhings and fretting of the child. Until expelled and the system cleared of them, the child cannot regain its health. Miller's Worm Powders are prompt and efficient not only for the eradication of worms, but also as a toner up for children that are run down in consequence.

"Daddy," cried the doctor's small son, "I want a drink."
"Sorry," murmured daddy, sleepily, "but I'm all out of prescription blanks."

The Germans have built a car that will run one mile on half an ounce of gas. Those Christmas cigarette lighters will come in handy yet.

Stop the Cough. Coughing is caused by irritation in the respiratory passage and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

"So Barker is doing a cash business and making lots of money."
"Yes, he's feathering his nest with down payments, so to speak."

SUNDAY SCHOOL LESSON

FEBRUARY 21

CHRISTIAN GROWTH

Golden Text: "But grow in the grace and knowledge of our Lord and Saviour Jesus Christ."—2 Peter 3, 18a.

Lesson: John 1:40-42; Matthew 16: 15-18; John 21: 15-19; Luke 2:40, 52; Ephesians 4:11-16; Philippians 1:9, 11; 3:12-16; Colossians 1:9-11; Hebrews 6:1-3.

Devotional Reading: John 15:1-8.

Explanations and Comments

Becoming a Follower Of Jesus, John 1:40-42.—After a day in the company of Jesus (read verses 35-39), Andrew sought his brother and told him that he and John had found the Messiah, Messiah (Hebrew, and Christ (Greek), mean "The Anointed One." Hebrew Idngs were anointed with oil when given their office, and the Spiritual King was thought of as The Anointed, The Chosen One of God, until The Anointed, the Christ, became the name by which he was designated. Then Andrew brought Peter to Jesus.

The nearer another is to us, the greater our responsibility for him. Our own brothers and sisters know us better than do those outside the family circle; they know our faults and failings, and therefore we shrink from talking to them about our spiritual experiences. It may require courage to do this, but our Christianity is shallow if we cannot do it.

As He looked upon Andrew's brother, Jesus said, "Thou art Simon the son of John; thou shalt be called Cephas." Cephas, the Aramite name, and Petros, Peter, the Greek name, mean "a stone," a detached piece of rock. Jesus knew Peter was too impulsive to be reliable; but he also knew that he would become the rock on which he would one day build His church (Matthew 16:13-19). "In a gallery in Europe there hang side by side Rembrandt's first picture, a simple sketch, imperfect and faulty, and his great masterpiece which all men admire. And so in the two names, Simon and Peter, we have first a rude fisherman, the man as he was before Jesus began his work on him; and, second, the man as he became after the friendship of Jesus and the teaching of Jesus and the discipline of life had wrought the transformation in him."—J. R. Miller.

Old-Time Athletics

An oldtimer was complaining that the schools devote too much time to athletics nowadays. "Well," someone asked, "what did you old-timers do when you went to school?" "We had fights," replied the old resister.

Wide Democratic Changes In Salvation Army And Its Future Government

London, Eng.—General Edward Higgins, new head of the Salvation Army, in an interview with the Associated Press recently, outlined his platform which projects wide democratic changes in the Salvation Army's constitution and future government.

"I intend immediately to appoint a commission of a half dozen specialists to consider changes which must be made in the 1878 constitution deed to which the disputed 1904 deed poll is only supplemental," he said.

"This will involve legal issues requiring expert advice and the ultimate invocation of an act of parliament to effect changes which will destroy one-man power over the Army's temporal affairs and put the constitutional foundation of the Army on a broader basis forevermore. Our domestic affairs we can care for ourselves.

"Another commission will investigate the question of the command succession. While I cannot foretell what will be their conclusions, my own opinion is that the Army's general should be elected for a term of 10 or more years subject to a strict age limit upon reaching which retirement would be compulsory."

Amend Post Office Act

Bill Has Been Given First Reading In House Of Commons

Ottawa, Ont.—A bill amending the post office act was given first reading in the House of Commons. The measure concerns the ownership of newspapers. It provides that a sworn statement must be furnished to the post office semi-annually giving the names and addresses of editors, owners and stockholders and other particulars. Religious publications are not affected and the names of small stockholders may be omitted in all returns, according to a clause in the bill. It is proposed that failure to comply with these provisions may incur a penalty of denying admission of dilatory newspapers to the mails. A further clause provides that paid reading matter must be marked as advertisements. Neglect to comply with this provision under the bill would incur a fine of not less than fifty dollars and not more than five hundred dollars on conviction. The measure was introduced by T. L. Church, Conservative, Toronto northwest.

Heads League Society

Ottawa.—Dr. H. M. Tory, president of the National Research Council of Canada, was elected president of the League of Nations Society at the seventh annual meeting held recently.

Vote Puts End To Question Of Granting Of Titles In Canada

Ottawa.—There will be no return to titles in Canada. By a vote of 114 to 60 the House of Commons defeated a resolution moved by C. H. Cahan, Conservative member for St. Lawrence-St. George, which raised once more the vexed question of the granting of titles in Canada.

The vote cut across party lines. It showed the Prime Minister and Hon. R. B. Bennett, Conservative leader, uniting in support of the motion. It divided the cabinet, the majority of its members present opposing the resolution. It divided the Liberal and Conservative parties, the majority of Liberal members present opposing the resolution, while the majority of Conservatives found themselves in support of Mr. Cahan's proposal.

Only in the smaller groups of the house was there unanimity of opinion. Progressives, members of the U.F.A., Independents, and Labor members all united in opposition to the resolution.

Mr. Cahan's resolution did not advocate the return of titles to Canada. It asked merely for the appointment of a special committee of the commons, consisting of 11 members, to "investigate a report upon the advisability of qualifying, amending, or rescinding the address to His Majesty the King, which was adopted by this house in May 1919, dealing with the conferring by His Majesty of titles of honor or titular distinctions

Stricter Penalty For Violating Drug Act

Amendments Under Consideration To Curb Traffic In Narcotics

Ottawa.—The House of Commons considered in committee of the whole a bill to amend and consolidate the opium and narcotic drug act. The measure provides increased penalties in cases of conviction for selling, giving away, or distributing drugs without a license from the minister of national health. Under the clause inserted a judge may at his discretion, sentence a convicted person to be whipped, in addition to the imposition of fine and imprisonment. A further change provides that persons guilty of infractions of the act shall be liable to payment of costs of prosecution. Other amendments are incorporated, a number of which are for purposes of clarity.

Trapped In Burning Cabin

Neighbor Unable To Effect Rescue Of Three Prospectors

Sioux Lookout, Ont.—Trapped by flames in their tiny cabin, three prospectors lost their lives at the narrow Woman Lake Portage, according to word reaching here. With them perished their four dogs which were chained to the outside of the building.

The three victims were Tony Tyrell, and men named Gougan and Viogt. No word is yet available as to where the three came from. Terrified barks of the dogs roused R. P. Dynes, sleeping in a shack some distance. He rushed outside to see the cabin in flames but found it impossible to effect a rescue. He could not even get near enough to release the still living dogs.

Word of the tragedy was brought out by aeroplane.

Dispute Was Settled

Canadian Workers Re-Installed In Old Positions In Toronto

Ottawa.—In the House of Commons H. B. Adshend, Labor, Ensl Calgary, asked the Minister of Labor whether he had any information to give the members with reference to German immigrants brought into this country to replace Canadian workers in Toronto.

Hon. Peter Heenan replied that he was now able to inform the House that a settlement had been reached whereby the Canadian workmen were re-instated in their old positions at the same wages which they received prior to the dispute.

Canadian Nationality

Resolution Introduced In House Of Commons Deals With Live Question

Ottawa.—In the House of Commons, E. D. R. Blissett (Liberal, Springfield), moved a resolution to the effect that persons born in Canada shall be described as being of Canadian nationality in all legislation and official and other documents. Mr. Blissett further proposed that persons of the white race born of parents whose family residence in Canada is more than three generations, shall be described as being of the "Canadian race" in all legislation and official and other documents. After a considerable discussion the resolution was withdrawn.

He submitted that there are some four million persons entitled to be known as Canadians from a racial standpoint.

D. F. Kellner (U.F.A., Athabasca), declared it was high time the people of Canada recognized the existence of a Canadian race, "for they were the only people in the world who did not do so."

Hon. R. B. Bennett, leader of the opposition, stated there was no such thing as "national" to be applied to people of the Dominion, and added "we are all British subjects; we are Canadian citizens so long as we continue within the empire."

Will Make No Change

Thanksgiving Day and Armistice Day To Be Celebrated As Two Distinct Features

Ottawa.—Thanksgiving Day and Armistice Day will continue to be celebrated in Canada as two distinct features of national life, the one in acknowledgement for the bounties of Providence, and the other in homage to the memory of Canada's sons and daughters who gave their lives in the great war. This was affirmed when the House of Commons rejected a resolution introduced by F. W. Gershaw (Liberal-Progressive, Medicine Hat), the purpose of which was to combine both Thanksgiving and Armistice Days into one holiday, on November 11, annually.

Rapid Comeback For Britain Predicted

Sir Alfred Cope Sees End Of Period Of Depression

Montreal.—That Great Britain was rapidly coming to the end of the period of depression and that she would come back to the foremost position she once held was predicted by Sir Alfred Cope, under-secretary of state for Ireland from 1919 to 1922.

He is at present managing director of the Amalgamated Collieries of South Wales and is here in the interest of marketing Welsh coal in Canada. He said the coal industry had introduced economies long overdue.

Cold Severe In Austria

Vienna.—The Austrian parliament was suspended for two weeks by Chancellor Seipel because of the cold weather. The government explained that this would save five tons of coal daily. The government is rationing coal and has sent urgent telegrams to Poland and Czechoslovakia, begging those countries to rush fresh supplies.

A CRUISE OF CONTRASTS

With tiny tugs panting in their efforts to nose the twenty thousand ton Canadian Pacific liner "Duchess of Atholl" into the stream, 350 passengers left New York recently on a "Cruise of Contrasts" that will take them to twenty ports in the West Indies, South America, Africa, Egypt, Italy, Monaco and France.

This is the second South America-Africa cruise by a Canadian Pacific ship. Last year it was undertaken by the "Empress of France," the first ship to land goods at the lonely island of Tristan de Cunha successfully. The visit to this isolated spot is one of the most romantic episodes in the lives of the cruisers, and when they return to Canada they will have the distinction of being among the seven hundred non-seafaring people ever to have that opportunity.

PASSES EXAMINATION

C. B. Kay, the first Canadian student to pass the final examination of the chartered institute of secretaries, London, England.

May Require Aid Of British Parliament

To Smooth Out Difficulties In Connection With Manitoba Act

Ottawa.—The possible necessity of invoking the legislative machinery of the British Parliament to smooth out certain difficulties of certain lands in Manitoba, was raised by R. W. Craig, counsel for the province, at a session of the Manitoba natural resources hearing.

Mr. Craig, during the course of his argument, pointed out that the British Parliament had passed the Manitoba Act of 1870 and provision had been made whereby it could not be changed by the Dominion parliament.

It might be necessary, in order to change the present financial terms between the provinces and the Dominion, to have the British Parliament validate such change by statute, Mr. Craig declared.

Historical authorities were quoted and precedence cited by Mr. Craig in support of his contention that the Dominion's interest in the province's lands were primarily of legislative jurisdiction and did not involve proprietary rights.

Large Butter Consumers

Canadians Use More Butter Than Any Other Nation

Vancouver, B.C.—Canadians are the largest consumers of butter in the world, declared Dr. J. D. Ruddick, Dominion Dairy Commissioner, in addressing the Western Canada Dairy Convention here on "Dairy Progress in 1928."

Their annual per capita consumption, he put down at 27 pounds to which must be added 3½ pounds of cheese. Increased home consumption, according to Dr. Ruddick, had led to a large drop in butter exports and in this connection he referred to the huge consumption of dairy products by the automobile tourists who annually invaded Canada, this trade alone now accounting for between 12,000,000 and 15,000,000 pounds of butter every year.

Vancouver.—Official announcement that the provincial government intended to shortly establish a market branch was made by Premier S. F. Tolmie, at the banquet here of the Western Canada Dairy Council Convention.

Will Send Samples Of Garnet Wheat To British Millers

Wholesale Murder

Chicago Gangsters Mow Down Seven Victims With Machine Guns

Chicago.—Chicago gangsters posing as policemen invaded the North Side stronghold of the George "Bugs" Moran gang, lined up seven helpless, unarmed victims with their faces to a white brick wall, and mowed them down with automatic pistols and machine guns.

The wholesale execution, an innovation in Chicago gang history which brought the total gang victims to more than 135 in the last few years, was carried out with all the precision of an army firing squad. Five men drove up to Moran's headquarters in a garage at 2122 North Clark Street, after putting through a telephone call inquiring whether certain members of the gang were there.

They rushed into the garage with drawn pistols and machine guns, informing the seven men they were police officers. Some of them flashed stars, and others wore parts of police uniforms. Without ado they herded the victims to a courtyard in the rear.

Overhead gleamed a powerful electric light to make the work of the firing squad easier. Whether the victims realized they had been trapped by a clever ruse will never be known. There was a word from the leader, the clatter of machine guns and pistols, and the massacre was completed.

A few minutes after, the firing squad, still carrying the pistols and machine guns, sauntered out, climbed into an automobile, stowed the weapons in the rear and drove away. Apparently few persons heard the firing.

Reparations Payment

Amount Of \$2,500,000 To Settle Claims To Canadian Citizens

Ottawa.—Shortly before adjournment of the House of Commons, Hon. Fernand Rinfret, secretary of state, moved the adoption of a resolution for the payment of reparation claims to Canadian citizens up to a total amount of \$2,500,000. Debate was adjourned.

Strong opposition was voiced by Hon. H. H. Stevens (Conservative, Vancouver Centre) against the amount which the government proposed to pay. Mr. Stevens believed that with the exception possibly of a certain class of claims all amounts approved by the reparations commissioner should be paid in full.

Alaskan Wins Dog Derby

Laconia, N.H.—Leonard Serpalla, Alaskan musher, won the New England championship dog sled race by beating out Emil St. Goddard of The Pas, Man., on the last 15 miles of the race and finishing 12 minutes and 17 seconds ahead of St. Goddard for the three-day run.

New Approach To Settlement Of The Disarmament Plan

London, Eng.—It was learned in well-informed circles that proposals for a new approach to settlement of the disarmament problem may be made by the British government to the United States in the near future.

There were definite indications of a feeling in British government circles that an entire new system of approaching the disarmament question was needed. It was understood that this attitude would be applied to all armament problems that are not already regulated by treaties.

It was stated that a new method of solution would be sought in an effort to safeguard Anglo-American friendship and allay suspicion and misunderstanding in both the United States and Britain.

Past attempts to arrive with mathematical precision at a parity of naval strength, matching ship for ship, and ton for ton, is now viewed by an increasing number of British officials as having been the chief obstacle to an armament agreement between Britain and the United States. They have been able to see little indication of the possibility of agreement on an equality basis.

Ottawa.—At a meeting here with Hon. W. R. Motherwell, minister of agriculture for Canada, of a large deputation of persons interested in the western grain trade, it was suggested that a shipment consisting of 2,000 or 10,000 bushels of Garnet wheat should be sent to Great Britain and other countries which buy Canadian wheat in considerable quantity.

This wheat would be sold to millers in the different countries, and their comments and findings in connection therewith asked for. It was suggested also that some part of the wheat collected for shipment might be used by certain Canadian millers, who also would be asked for their comments.

If no seriously adverse criticisms were received from the foreign millers, the Grain Board would be expected to allow Garnet to go into the same grade as Marquis for the 1929 crop.

The foregoing suggestions, says a statement issued by Mr. Motherwell, were all agreed to by the meeting, and the department of trade and commerce will proceed at once to secure the necessary quantities of first-class Garnet wheat to make up this shipment, and to see that it gets into the hands of millers in Great Britain and other countries of Europe purchasing Canadian wheat.

These millers will be requested to report soon upon their experience with the Garnet wheat handled by them. At the same time, samples of the shipment in relatively small commercial milling quantities, will be supplied to certain Canadian millers, who will also be asked to report upon their experience in connection with milling and handling the flour therefrom.

In 1927, the statement says, the inspection department of the Board of Grain Commissioners decided that the maximum grade that should be allowed for the new variety, Garnet, should be No. 2 northern. This fact caused a great deal of dissatisfaction among the farmers of the western provinces.

The farmers' dissatisfaction was due in no small measure to the fact that they judged that mixing practices which were so strongly in evidence in 1927, would very probably be equally in evidence in connection with the 1928 crop, and they felt that consequently the Garnet wheat, for which they received payment on the basis of No. 2 northern, might very well find its way into a No. 1 northern mixture, or, at any rate, be used to raise a No. 3 grade wheat to No. 2.

The inspection department felt, however, that the grade given to Garnet was a proper one, particularly as the Grain Act requires that, for wheat to grade No. 1 northern, it must be equal to Marquis, and the evidence available had not quite established such equality.

WINTER WORK

TO CONTROL WEEDS

One of the most serious problems confronting the farmer of Southern Alberta is the weed menace. It has been truly stated that farming is a continued warfare against weeds.

So powerful are the weed enemies that the farmer should take advantage of every opportunity to strengthen his position against them. The importance of keeping weeds under control cannot be too strongly emphasized.

Perhaps it may appear rather early in the season to talk of weed control but nevertheless there are a number of things a farmer can do between now and spring that will aid him in this work. These practices are all a part of good farming and it is desired at this time to point out their influence on the control of weeds.

One of the most important jobs a farmer can do during the winter months is the cleaning of his seed. By good seed is seed that is free from weed seed, pure as to variety, and strong in vitality.

An astounding fact regarding the character of seed used by Alberta farmers was discovered in the survey conducted by the Dominion Seed branch of seed actually found in grain drills. The fact discovered was that many farmers are sowing dirty seed. Actually sowing weed seeds. Why? Most everyone realizes that the sowing of weed seeds means trouble, yet why do farmers do it? Perhaps one explanation is that they have postponed the cleaning of their seed until the last minute and during the rush of spring work have not had time to do the work properly.

Now is the time to clean your seed. Now is the time to order new seed if seed is being purchased. Have your seed cleaned and in the bin when spring opens up and something will have been done towards the control of weeds.

Seed should have strong vitality. Plump and showing a strong germination test will produce the strong healthy plants that grows rapidly. Such plants can more successfully compete against weeds. On the other hand weak seed produces weak plants and weak plants cannot compete against weeds. The result will be a patchy weedy crop. Farmers can have a germination test made at the Dominion Seed branch or can do it in their own homes by germinating the seed between moistened blotters. Strong vitality is an essential of good seed and if a farmer sows such seed he will have done something towards the control of weeds.

The use of clean feed is another important item in the control of weeds. Some farmers diligently clean their seed grain but overlook the fact that their land can become infected by the use of dirty horse feed. Many small weedseeds, taken in the feed, will pass through the animal undigested and retain their power of germination. Weed seeds should be cleaned out of feed or ground to destroy the the germination of the weeds. This important practice can be done now and will aid considerably in the control of weeds.

Another good piece of work can be accomplished by the farmer at this time of the year by putting harness and machinery in good running order sometimes weeds get ahead of us thru delays caused by breakdowns or waiting for repair. We want our machines at their maximum efficiency and with a minimum of delay. Now is the time to order repairs, and put everything in shape for an efficient seasons run. Such work done now will help materially in the control of weeds.

There is another important thing we can do at this time of the year and that is to plan our seasons work. Do the farming methods we have been using satisfactorily combat weeds, if not there is time now to find new methods. The Provincial Department of Agriculture publishes a weed bulletin which outlines practical methods for the control of weeds. A study of this bulletin will aid us to adopt a system of farming suitable to the needs of the individual farmer. If we have such a plan, how much easier it will be to organize our work in such a manner that everything we intend to do will be done and done on time.

The practices outlined above are embodied in systems of good farming. Farming is a warfare against weeds it is a fight that must be carried on through the twelve months of the year. True, most of the work comes during the summer but some work can be accomplished during the winter. The above practices if carried out between now and spring will greatly strengthen the farmers position in the crusade against one of Alberta's serious problems, WEEDS.

DON'T MISS THIS ONE!

The Lord Nelson at Halifax

Citizens of Halifax take very justifiable pride in the fact that in bringing to fruition their dream of a new modern hotel, they have created a beautiful hostelry which, while still too new to have many valued associations, has an atmosphere redolent of those days of grace in which their city had its beginnings. The Lord Nelson, but recently opened, has a charm not usually associated with a modern institution of its kind and a decided nautical touch. The grill, for instance, is named the "Ward Room," and as one sees the sailor suited waitresses moving about the tables one half expects to hear the "Ship Ahoy," or "Light on the starboard bow, sir." Lanterns help to foster the ship-board illusion, and, one of these lanterns, pictured above, has very close associations with the sea. When Lord Nelson lay dying in the cockpit of H.M.S. Victory, while the great old ship heaved in the rollers off Cape Trafalgar on October 21, 1805, this lamp illuminated the scene as the doctors strove to save a life the loss of which was one of England's greatest.

A bust of Nelson, an original from the Royal Naval Institute at Greenwich, and an exceptionally fine piece of work, stands in a corner of the lounge, facing a model of his flagship. In the main dining-

room, too, a very fine oil shows the admiral on deck and his men running up a signal of victory.

The Lord Nelson is, however, a little more than an art centre. It is a very modern hotel of 200 rooms facing the Halifax Public Gardens. Its public and convention rooms are exceptionally well planned and appointed. The design is Georgian, simple and beautiful. While it has been built as the result of a community effort, the Lord Nelson is operated by the hotel department of the Canadian Pacific Railway, which company has considerable interest in it. It will, therefore, compare very favorably in service and all essentials with the great Chateaus and other hotels of the company.

CHAPTER XIV.—Continued.

Hand stripped to the waist. Connie's eyes rested on the mighty frame of this huge blond; the bunched and rippling muscles, the great chest covered with a mat of thick hair, and the enormous limbs. Her glance then turned and roved to the man who was to fight for her honor. Donald's eyes were like burning coals. His face had regained its color, but was contorted with a passion that made him seem unnatural. Yet he appeared a mere stripling in comparison to his burly antagonist.

For a moment Connie became a primitive woman. She felt as though she could read and tear. Her eyes darted blue lightnings of wrath toward the man who had insulted her, and her small hands clenched in impotent fury. Her nails cut into her palms as she exercised every ounce of self-control to keep from screaming aloud. Donald was fighting for her. She caught her breath in a quick stab. Her heart was beating with alternate throbs of joy and fear. A sudden fit of trembling seized her, and her head felt light and giddy.

Hand's reputation as a rough and tumble fighter was well known throughout the province. It was his proud boast that he never had been whipped. He advanced now, a sinister leer on his face. Andy ran to Donald's side.

"Box 'im, Donnie," he whispered. "Don't let 'im get 'old on you." "You goin' to vip me? De dude go'n' to vip me? Ach!" scoffed Hand in guttural accents.

He came slowly forward with arms spread wide, his thick fingers working convulsively. Donald leaned slightly forward and waited. As he neared him, Hand tore in sure of himself in the rough and tumble. Donald side-stepped the big man's first rush and shot his left to his face. He was not properly set for the blow, but it stung Hand to madness.

"Ach!" he grunted, "stand and fight you d— coward!"

He came on, his arms swinging wildly. Leaping aside, Donald's heel struck a stump, and before he could regain his footing the giant's arms were around him in a bone-crushing grasp. His hands were clasped at Donald's waist, and the big head was pressed suffocatingly against his throat. Donald was forced slowly backward to strike the ground with a thud, the big man on top.

"Now I got you!" panted Hand as he released his hold on Donald's waist and aimed a blow at his face. With a quick movement the under man turned face down. Hand struck him viciously as he lay prostrate under him.

Connie's eyes were wide with horror, and a muffled scream escaped her lips as the blow fell.

With a quick, convulsive movement of his little body Donald threw Hand from his back and sprang to

his feet. Whirling quickly as the foreigner came toward him, he sent in a volley of blows to his opponent's face. Hand staggered, but did not fall. His lips were cut and bleeding; his nose was broken; and he spat out several broken teeth. Any one of the blows landed was sufficient to send an ordinary man down for the count, but still the gargantuan giant came on.

In and out Donald flashed, his arms moving like steel pistons. Hand could not keep away from the punishing left hand of his lighter opponent. Men not trained in the science of boxing have no punishing power in their left hand, but depend solely on their right. Such was the case with Hand. His style did not vary for a moment. With head lowered between his powerful shoulders, he would bore in, swinging wildly in the hope of landing a lucky punch, or striving to get a hold on his adversary. Donald's hand kept beating a tattoo on his rock-like jaw, but still Hand came forward, slowly and relentlessly as a steam-roller.

Crowding Donald back to the line of tense spectators, Hand rushed him into the scattering crowd and seized him in a rib-cracking embrace. Donald broke the hold, but not before the brute had butted him over the eye. With the blow Donald's senses reeled and the blood gushed from a wide gash on his brow. A blow from the foreigner's big fist then caught him over the heart and sent him staggering to his knees. With a curse the big man came after him. Andy shouted hysterical words of advice.

Donald came slowly to his feet and mechanically side-stepped as Hand came stumbling toward him. Donald evaded him until his head cleared, and then summoned his remaining strength into one mighty blow that landed flush on his opponent's midriff. The blond beast came to his knees with a dull grunt.

"Go after him!" yelled excited voices from the crowd.

Donald stepped forward with fist drawn back to strike the kneeling man, but his arm fell to his side and he shook his head. "Get up!" he commanded hoarsely.

Even the strikers gasped their appreciation of this honorable act. A murmur of applause came from both sides. The foreigner shook his shaggy blond head and came uncertainly to his feet and the sanguinary battle went on. Both men were tired. Hand's breath was coming in short-choking gasps from his tortured lungs, and his face was one smear of blood. Donald's left eye was closed; his lips were split, and the gash over his eye had covered his body with blood. His arms were tired from pounding the iron jaw of his adversary. The big logger's strength was waning; the pounding administered by Donald was beginning to tell. But Donald was too weak to avoid his rushes. In a clinch Hand again butted him with his head.

Blackie, his eyes blazing, leaped forward with a peavy handle in his hand. "You fight fair, d— you, or I'll brain you!" he shouted. One of the strikers attempted to wrest the peavy handle from his hands. Blackie felled him with a blow of his fist. It looked for one tense moment as if there would be a general melee. There came sudden mutterings from the crowd of strikers.

"Back!" John Miller's voice rang out sharp and clear. "I'll kill the first man that interferes!" The eyes shining over the long-barrelled Colt held a dangerous glint. The men who had moved to the centre backed away hurriedly.

Back and forth the combatants struggled, neither gaining any decided advantage, each trying to land a blow that would end the battle. Reeling, gasping, striking, falling to their knees from sheer weakness, the men fought on under a burning noontide sun.

No knight of old ever fought more nobly for a fair lady's honour than did Donald McLean that day by the lake-shore. His undershirt was torn to tatters, showing his white skin blotched with welts and bruises. He was losing his sense of distance. Swinging wildly with his left, his wrist struck Hand's adamant jaw and the onlookers saw his face writhe in pain as the arm fell helplessly to his side.

"E's broken 'is 'and," groaned Andy.

"Oh, stop it, Andy, please stop it!" sobbed Connie, her arms held out in entreaty.

Donald's face turned a sickly grey and as the well-nigh sightless foreigner staggered weakly toward him, he with a strength born of agony whipped his right to his opponent's sagging jaw. The big man faltered, sank slowly to hands and knees, then stretched at full length, his face pressing the soil, quivered and lay still. No sound came from the crowd. The thing had been too stupendous for immediate shouting or applause. Donald stood for an instant swaying uncertainly, then turned to stumble toward his cabin.

Blackie sprang to the top of a stump and swung his hat in the air. "Three cheers for our boss!" he yelled wildly.

A roaring cheer came from the crowd with a right good will.

"Boys, let's go back to work!" shouted Blackie.

"We're with you, Blackie!" they answered.

Gillis reached Donald's side as he tottered into the cabin and caught him in his arms as he collapsed into unconsciousness. The big man plected him up tenderly and placed him on the bed.

"Get some 'ot water and towels and telephone for Dr. Paul," commanded Andy tersely.

As Gillis left to fill Andy's commission, Connie fell on her knees by the bedside and wept with wild and passionate violence. "Oh, Donald! Donald!" she sobbed, "you fought for me. I love you! I love you! Oh Andy," turning her streaming eyes to the little man, "he won't die, will he? Tell me he won't die!" Her trembling fingers were smoothing Donald's dark hair, and she kissed his battered face tenderly, all the while calling his name hysterically.

With tears in his eyes and a heart full of sympathy, little Andy looked down on the recumbent form of his unconscious friend. "E's all right, Connie. E'll be all right in a few days," he answered her in a choking voice.

(To Be Continued.)

Recipes for This Week

(By Betty Barclay)

PINEAPPLE JELLY

- 1 tablespoon gelatine.
- $\frac{1}{4}$ cup cold water.
- $\frac{1}{2}$ cup boiling water.
- $\frac{1}{2}$ cup canned pineapple syrup.
- 3 tablespoons lemon juice.
- $\frac{1}{4}$ cup sugar.
- 3 tablespoons pineapple cubes.
- 3 tablespoons Maraschino cherries.
- 1 tablespoon cut walnut meats.
- 3 tablespoons cubes of orange.

Soak gelatine in cold water; dissolve in boiling water, and add pineapple syrup, lemon juice, and sugar. When gelatine is beginning to get stiff, stir in the fruit and nuts, of which there should be, in all, three-fourths of a cup. Turn into a mold, and chill.

MOCK DUCK (Norwegian)

- 2 pork tenderloins.
- 2 tablespoons butter.
- 1 cup sweet cream of very rich milk.
- 5 boiled prunes.
- 1 cup thick sour cream.
- 2 apples.
- Salt and pepper.

Cut tenderloins half through lengthwise. Open and pound flat. Cut apples in thin slices, cover the tenderloin. Remove stones from prunes and put over apples, add seasonings and cover all with second tenderloin. Roll and tie securely. Brown in butter. Pour on a little broth, the sweet and sour cream, and cook slowly for one hour.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published by The Saskatchewan Dental Society

GINGIVITIS

Meaning what? It is—a suffix, implying inflammation and gingiva—the soft tissue immediately encircling the tooth.

This, then, is an inflammatory condition of the gum tissue, adjoining the teeth.

Consult your mirror: Notice how snugly these tissues hug the tooth surfaces in health, filling the interstices and guarding the supporting structures from injury and disease.

Now you will have observed that the gingivae are not attached to the tooth surfaces for a short distance down and hence, are "free"; also, that their color in health is a lustrous pink.

But the inflammation appearing, you have a rush of blood within—and soreness develops, so that you readily perceive that they are far from the state of health.

Now what might cause this?

It may be that some body disturbance is accountable. General ill-health, diseases of organs or glands concerned in body welfare such as diabetes, or run down nervous system may lead to this disorder.

Among the more positive causes, filth and tartar no doubt play a part; the wedging of food between teeth with faulty contacts, and disease producing organisms are all held responsible.

If, for any reason, there is a slight opening between two teeth, food which is tough and stringy will be crowded into the space and cause pressure upon the underlying tissue. A single such occurrence may do but little harm provided the food is promptly removed, but where there is this repeated pressure and irritation, the tissue is inflamed much of the time. Similarly the crowding or "tartar" upon these tissues or repeated injuries from whatever source will set up this process.

It is in these gingival tissues then, that the initial injury may occur which, if neglected, frequently leads to the infective process known as pyorrhea. So that any inflammatory condition or tenderness of the gums should receive early recognition, and have prompt remedial treatment at the hands of your dentist.

Has Increased Crop Area

In Manitoba there is one tractor for every 4.6 farms; in Saskatchewan one for every 4.7 farms and in Alberta one for every 7.5 farms. The mechanical equipment has been a material factor in the large increase in area under field crops in the prairie provinces, which has increased from 3,600,119 in 1900 to 38,858,263 acres in 1928. Practically 8,500,000 of this increase has taken place since 1920.

Magistrate (dealing with New Year's Eve episode): "Who was driving when you collided with the other car?"

Merry Motorist (triumphantly): "None of us; we were all in the back seat."

In the Law Courts, London, there are 1,100 rooms, a printing press and a blacksmith shop.

To believe with certainty we must begin by doubting.—Stanislaus.

Bracing Breakfast for Bitter Weather

SHREDDED
WHEAT

Serve with piping hot milk - Doesn't overload your stomach - Makes you alert and active - Fine for youngsters

Belongs To Middle Class

Sun Is Ordinary Star In Scale Of Brilliance Says Astronomer

The sun is a very humble unit amid the great stellar population according to A. S. Eddington, the astronomer. It is, he says, a very ordinary star about midway in the scale of brilliance. We know of stars which give at least 10,000 times the light of the sun; we know also of stars which give 1-10,000 of its light. But those of inferior light greatly outnumber those of superior light.

In mass, in surface temperature, in bulk, the sun belongs to a very common class of stars; its speed of motion is near the average; it shows none of the more conspicuous phenomena such as variability which excite the attention of astronomers. In the community of stars the sun corresponds to a respectable middle class citizen.

It happens to be quite near the centre of the local star cloud; but this apparently favored position is discounted by the fact that the star cloud itself is placed very eccentrically in relation to the galactic system (the Milky Way), being in fact near the confines of it. We cannot claim to be at the hub of the universe.

Little Helps For This Week

"Strengthened with all might, according to His glorious power, unto all patience and long-suffering with joyfulness."—Colossians 1. 11.

I longed to gird the harness on To work with might and will; Stern was the voice that said to me,

My child, wait and be still. He only knoweth how to serve, Who knoweth how to wait; Thus test I all who wish to work Within my vineyard gate.

—Mary Frances Butts.

Working or waiting, our souls will hang on Him. And waiting, as we must recognize and remember, is a sacrifice of self, a real martyrdom no less than working. To win the soul in patience, to bear the trial of delay, to watch for the dawn through the chill hours which precede it, to keep fresh and unsullied the great hope that Christ will come, is a witness to the powers of the unseen world, which the Spirit of God alone can make possible.

—Brooke Foss Westcott.

No country can approach Canada in the use of the plane in protective forest control.

Simple Precautions Against FLU

Sore Throat —

— The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—coughing will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

WINDOLITE

The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, scabos, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

When Food
Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

News Notes

The Lethbridge male chorus of fifty voices are giving a concert at Raymond in the very near future, under the auspices of the Stake Choir.

The opera "Fidelio" fulfilled their engagement at Cardston Thursday night to a crowded house. Those who commented upon the production spoke with much praise for the people who put the thing over. They say, "Raymond should be proud of the talent displayed," the costumes the dancing, the music, in fact everything concerned was put over in wonderful style.

Owing to the recent wind and drifting of the roads the company went by way of C. P. R. thus necessitating staying over. The Cardston people opened their homes to the large crowd and cared for them that night.

At The S. of A.

Dr. Neidig who is engaged by the consolidated Smelters, Trail, B. C. was a visitor Thursday, February 14. Dr. Neidig is directing super-phosphate experiments in connection with the Provincial and Dominion Departments of Agriculture. His purpose here was to outline super-phosphate experiments in connection with sugar beets.

Dr. James Warbasse, President of the co-operative League of United States of America accompanied by Mr. D. M. Malin, Supervisor of co-operation for the Government will visit the R. S. A., Wednesday, at 4:30 p. m. and a public meeting at 8 o'clock. The public is cordially invited to attend the evening meeting and it is hoped that many farmers will avail themselves of this opportunity.

Dr. Haworth made a very hurried trip to Edmonton going Wednesday and returning Friday. We regret very much that Mrs. Haworth was unable to return with him.

Last Friday evening the Agri-club were the hosts to the Raymond Intermediates in the local High School gym. The game which ended in a score of 54-24 in favor of the Intermediates was a poor one to watch from the spectators view point. There was very little real basket-ball demonstrated in fact, Rugby would have been a better name.

We regret very much the injury Ray Fairbanks, one of our old boys who is a good clean player and a real sport. Accidents were not altogether on the side of the Intermediates as Merlin Eaves, our speedy little forward, suffered a severe sprain of one of his ankles. Let us hope for better games in the future and hear good will between all teams.

A shipment of livestock for judging purposes has just arrived. The car was made up from the Olds and Clarholm Schools. It included Herford, Shorthorn and Angus cattle; Yorkshire and Berkshire hogs, and Hampshire sheep. This stock will prove a valuable addition as classroom material, to that already here.

"His Uncle's Niece" a rollicking farce in three acts will be presented in the R. S. A. auditorium by the Literary, February 22 nd. at 8:15 p. m. Price, adults 50 cents, students, 25. All welcome.

RAYMOND

World-Famous, Three-Fuel Hart-Parr 18-36

In official tests, conducted by nationally known engineers, who used cheap distillate for fuel, the great Hart-Parr 18-36 registered a drawbar pull of 5,535 pounds at two miles an hour, and 4,075 pounds at three miles an hour. On the belt it easily pulled the amazing load of 43 horsepower. The Hart-Parr is a three-fuel tractor, burning gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest, low-grade fuels. Hart-Parrs are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive one yourself and experience the thrill of controlling tremendous power.
